DETAILED ACTION

Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-10, drawn to a permanent magnet, classified in class 335, subclass 302.
 - II. Claims 11-30, drawn to a method of making a permanent magnet, classified in class 148, subclass 101.
2. The inventions are distinct, each from the other because of the following reasons:

~~Inventions I and II are related as process of making and product made. The inventions are~~
distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the magnet can be made by using varying types of magnetic material.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. This application contains claims in group I directed to the following patentably distinct species of the claimed invention:

Embodiment 1: claims 1-2 and 5-6, drawn to a desired magnetic field at a selected point (it is noted that claim 5 appears to be identical to claim 1);

Art Unit: 2832

Embodiment 2: claims 3-4 and 7, drawn to an undesired magnetic field at a selected point (it is noted that claim 5 appears to be identical to claim 3).

This application contains claims in group IV directed to the following patentably distinct species of the claimed invention:

Embodiment 1: claim 11;

Embodiment 2: claim 12;

Embodiment 3: claim 13;

Embodiment 4: claim 14;

~~Embodiment 5: claim 15;~~

Embodiment 6: claim 16;

Embodiment 7: claim 17;

Embodiment 8: claims 18-27; and

Embodiment 9: claims 28-30.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, none of the claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Art Unit: 2832

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Examiner Lincoln Donovan whose telephone number is (703) 308-3111.

The fax number for this Group is (703)-872-9318.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is (703) 308-1782.
